

# StoreLIVE!

## Scale Manager

### Summary

StoreLIVE! Scale Manager is a software application installed on a Windows based computer that allows item data including ingredients and costs to be downloaded from Dutch Valley and transmitted to networked scales. Items can also be manually entered into the software and transmitted to the scales. The application provides an efficient method to create or change item data in the scale, as well as a tool to keep selling prices up to date as costs change. Remote installation of the software is provided along with training tailored to individual store needs.

### Dutch Valley Integration

Item data including ingredient data and costs can be downloaded from Dutch Valley on a regular basis. This data can be reviewed, modified if needed, and then transmitted to the scale with a few simple mouse clicks.

The screenshot displays the 'Dutch Valley Catalog' software interface. At the top, there is a toolbar with icons for Refresh, Print Results, Clear Search, Import Items From Dutch Valley, and Price/Cost Change. Below the toolbar, there are search options (Quick Search, Advanced Search) and a 'Last Update: 11/8/2011 1:52 PM' indicator. The main area contains several links for viewing orders and items, and a 'Merge Existing Items' button. A table with columns for item details is visible, including PLU, Depart..., Category, Mfg, Name, Size, Unit, Last Purc... Qty, Last Price, Last Price w/Freight, List Price, Last Purc... Unit, Margin, Sugg. Retail Price, Last Chan..., Last Purch..., Ext. Price, and Selected. A dialog box titled 'Connect to Dutch Valley?' is overlaid on the table, asking 'Connect to Dutch Valley and Retrieve latest item updates?' with 'Yes' and 'No' buttons.

...	PLU	Depart...	Category	Mfg	Name	Size	Unit	Last Purc... Qty	Last Price	Last Price w/Freight	List Price	Last Purc... Unit	Margin	Sugg. Retail Price	Last Chan...	Last Purch...	Ext. Price	Selected
-----	-----	-----------	----------	-----	------	------	------	------------------	------------	----------------------	------------	-------------------	--------	--------------------	--------------	---------------	------------	----------

## Cost/Price Management

Item pricing can be simplified by assigning a target margin % to each item. As item costs change, selling prices can be updated based on the target margin with a single click. This eliminates the need for manual or external spreadsheet calculations! Once price updates are complete in the Scale Manager program, the updated prices can be transmitted to the scale with a few additional mouse clicks.

## PLU Listing

A PLU List can be printed or exported to programs such as Excel. This eliminates the need to maintain a PLU list in other applications for printing or lookup purposes.

The screenshot shows a 'Print Preview' window with a toolbar containing various options like Open, Save, Print, Margins, Orientation, Scale, Size, Find, Bookmarks, Navigation, Zoom, Page Color, Watermark, and Export. The main content area displays a table titled 'PLU List' with the following data:

Dutch Valley #	PLU	Item
<b>Bulk Food</b>		
<b>Candy, Gummy</b>		
629105	54287	Gummi Bears
<b>Bulk Food</b>		
<b>Canning Supplies</b>		
803105	53757	Citric Acid
<b>Bulk Food</b>		
<b>Carob Products</b>		
600144	51593	Carob Coated Peanuts
<b>Bulk Food</b>		
<b>Choc Drops/Cookie Drop Mixes</b>		
218105	51535	Triple Chocolate Chips
<b>Bulk Food</b>		
<b>Cookies</b>		
500123	52447	Crushed Hydrox Cookies
<b>Bulk Food</b>		
<b>Sugar Free Candy</b>		
601742	52615	Sugar Free Orange Jelly - Milk
<b>Bulk Food</b>		
<b>Sugar/Sweeteners</b>		
116016	51025	Domino Granulated Sugar
116025	51027	Domino 10X Sugar

## Support for Deli/Meat/Produce Departments

Departments and items other than Bulk Foods are also supported by the Scale Manager application. Item information for items such as deli or meat items can be manually entered into the Scale Manager application, and transmitted to the scale with the same simple procedure as bulk food items.
